CAREER OBJECTIVE

Motivated Full Stack Developer with hands-on experience in HTML, CSS, JavaScript, React.js, Node.js, Express.js, PHP, and Laravel. Seeking to build scalable and user-friendly web applications while continuously improving my full-stack development skills and contributing to a growth-oriented organization.

CERTIFICATIONS

- ✓ Completed Certificate in Office Automation (COA)
- ✓ Completed Workshop on React.js – SDLC
- ✓ Completed MERN Stack Developer Internship at CodeAlpha,
- ✓ Completed C++ Programming Course at Cybernaut,

EDUCATIONAL QUALIFICATION

- College
 - ✓ Bachelor of science (Computer science)-65%
 - ✓ Jairams Arts & Science College,Karur
 - ✓ Bharathidhasan University
 - ✓ Passing Year : 2023-2026

INTERNSHIP EXPERIENCE

- **MERN Stack Developer Intern – CodeAlpha**
 - ✓ Developed real-time web applications using MongoDB, Express.js, React.js, and Node.js.
 - ✓ Built **Social Media, Project Management, and E-Commerce** applications
 - ✓ Gained hands-on experience in **full-stack development and REST APIs**.

TECHNICAL SKILLS

- Programming Languages
 - C++, JavaScript, PHP, Dart
- Frontend
 - HTML,CSS,Bootstrap,React.js
- Backend
 - Node.js,Express.js
- Mobile Development
 - Flutter
- Database
 - MySQL,MongoDB,FireBase
- API & Tools
 - REST API, Git, GitHub

PROJECTS

✓ **Project Review Management System– Web Application**

Technologies: React.js, Node.js, Express.js, MongoDB (Atlas), Axios

Authentication: JWT, bcrypt

Database: MongoDB (Atlas)

Client Storage: SessionStorage

- » Developed a full-stack Project Review Management System using the MERN Stack, enabling developers to submit projects, administrators to assign reviewers, and reviewers to evaluate submitted projects through a structured workflow
- » Implemented secure user authentication and authorization using JWT and bcrypt, with role-based access control for Developers, Reviewers, and Administrator
- » Built RESTful APIs with Node.js and Express.js, integrated with React.js using Axios, and managed application data using MongoDB Atlas
- » Designed a responsive and intuitive user interface with complete CRUD functionality, providing seamless project submission, reviewer assignment, review tracking, and status management

Live Demo: <https://prms-frontend-delta.vercel.app/>

✓ **E-Commerce Management System (Internship – Web Application)**

Technologies: React.js, Node.js, Express.js, MongoDB (Atlas), Axios

Authentication: JWT, bcrypt

Database: MongoDB (Atlas)

Client Storage: LocalStorage

Media Storage: Cloudinary

- » Developed a full-stack E-Commerce Management System using the MERN Stack, providing a seamless shopping experience with separate functionalities for administrators and customers
- » Implemented secure authentication and role-based access control using JWT and bcrypt. Built complete CRUD operations for product management, enabling administrators to add, update, delete, and manage product information
- » Integrated Cloudinary for efficient image upload and cloud storage, while using MongoDB Atlas to manage products, users, orders, and other application data.
- » Built customer features including product browsing, product details, shopping cart, checkout, and order placement. Utilized LocalStorage to manage cart data and user session information, delivering a responsive and user-friendly shopping experience

Live Demo: <https://prms-frontend-delta.vercel.app/>

✓ **Project Management Tool (Internship – Web Application)**

Technologies: React.js, Node.js, Express.js, MongoDB (Atlas), Axios

Authentication: JWT, bcrypt

Database: MongoDB (Atlas)

Client Storage: LocalStorage

- » Developed a full-stack Project Management Tool using the MERN Stack, enabling administrators to create projects and efficiently assign tasks to individual team members.
- » Implemented secure authentication and role-based access using JWT, allowing users to register, log in, and access project features based on their assigned roles.
- » Designed a task-based workflow where projects can be divided into individual components and assigned to different team members, enabling parallel development and organized task management.
- » Implemented an admin review system where completed tasks can be reviewed and comments or feedback can be provided to team members for better project coordination and progress tracking

Live Demo: <https://code-alpha-project-managment-tool-f.vercel.app/>

✓ **Social Media (Internship – Web Application)**

Technologies: React.js, Node.js, Express.js, MongoDB (Atlas), Axios

Authentication: JWT, bcrypt

Database: MongoDB (Atlas)

Client Storage: LocalStorage

- » Developed a full-stack Social Media Website using the MERN Stack, providing users with an interactive platform to create profiles, share posts, and engage with other users.
- » Implemented secure user authentication and authorization using JWT, enabling users to register, log in, and securely access their accounts.
- » Developed social features including creating posts, viewing user content, liking posts, and interacting with other users through a responsive and user-friendly interface..
- » Integrated MongoDB for storing user and post data while implementing REST APIs with Node.js and Express.js for efficient communication between the frontend and backend.

Live Demo: <https://code-alpha-project-managment-tool-f.vercel.app/>

Android Application

✓ **Transport Tracking Management System – Android Application**

Technologies: Flutter, Dart

Database: Firebase (Authentication, Cloud Firestore)

Maps & Location: Google Maps API, Geolocator

- » Developed a Transport Tracking Management System mobile application using Flutter and Dart to enable real-time tracking of school and college buses.
- » Integrated Google Maps API and Geolocator to display live bus locations, routes, and GPS-based tracking with real-time location updates
- » Utilized Firebase Authentication and Cloud Firestore for secure user authentication and real-time data management
- » Designed a responsive and user-friendly mobile interface, providing accurate bus tracking and an enhanced user experience

Frontend Projects

✓ **Student Task Management – Web Application**

Technologies: React.js, HTML5, CSS3, Axios

Storage: SessionStorage

Mock API: JSON Server

- » Developed a fully functional Student Task Management web application using React.js with a reusable component-based architecture.
- » Implemented CRUD operations for topics and tasks by integrating Axios with JSON Server and managed user sessions using SessionStorage.
- » Built a responsive and user-friendly interface to organize tasks, track progress, and improve productivity.
- » Applied React concepts including state management, routing, event handling, and API integration to deliver a dynamic frontend application.

Live Demo: <https://lucent-kitsune-89b19.netlify.app/>

✓ **Electronic Product E-Commerce – Web Application**

Technologies: HTML5, CSS3, JavaScript

Storage: LocalStorage

- » Developed a responsive e-commerce website for electronic products using HTML5, CSS3, and JavaScript. .
- .
- » Implemented dynamic product listing, shopping cart, and user interaction features to enhance the shopping experience.
- .
- » Utilized LocalStorage to manage product information, cart data, and user details, enabling data persistence across browser sessions.
- » Applied responsive web design and interactive UI principles to ensure a seamless experience across mobile, tablet, and desktop devices.. .

Live Demo: <https://mugi1906.github.io/Electronic-E-Commers/>

✓ **Fresh Cart Foods Delivery - Website**

Technologies: HTML5, CSS3, Bootstrap 5

- » Developed a responsive e-commerce website using HTML5, CSS3, and Bootstrap 5 with a modern and user-friendly interface.
- .
- » Implemented responsive layouts using the Bootstrap grid system to ensure compatibility across mobile, tablet, and desktop devices.

Live Demo: <https://mugi1906.github.io/Fresh-Crat-Website-/>

✓ **Organic Foods Delivery - Website**

Technologies: HTML5, CSS3

- » Developed a responsive Organic Products website using HTML5 and CSS3 with a clean, modern, and user-friendly interface
- » Applied responsive web design principles to deliver a visually appealing experience across mobile, tablet, and desktop devices

Live Demo: <https://mugi1906.github.io/Organic-Food-Delivery/>

✓ **Car Dealership Website- Website**

Technologies: HTML5, CSS3

- » Developed a responsive **Car Dealership Website** using HTML and CSS, showcasing cars, brands, and dealership services.
- » Designed a clean and user-friendly **car showroom interface** with responsive layouts for a seamless browsing experience across different devices.

Live Demo: <https://mugi1906.github.io/CarWebsite/>
